

KITO EXPLOSION PROOF TYPE ELECTRIC CHAIN HOIST WITH MOTORIZED TROLLEY PARTS LIST

POINTS TO BE NOTED :

1. Excluding chain, top hook, bottom hook assembly and chain container, the parts for explosion-proof type RES and RESM are shown on this parts list. Parts solely for RES and RESM are marked with an asterisk. Alphabetical letters marked on the same columns of parts indicate interchangeability in each capacity. Unmarked parts are interchangeable with standard ES and MS parts and you should refer to the column of interchangeability with standard parts showing Section-Fig. No. and Part No.
2. RES hoist is designed based on the main body of standard ES 1 t-S and 2 t-S. 7.1mm chain and its related hooks are used for RES 005S and 010S, and other capacities have the same size chains and hooks as standard ones. Therefore in consideration of this fact, you are requested to refer to standard ES parts list if you need to verify chain, top and bottom hook assembly and chain container.

IMPORTANT

When ordering replacement part, please specify the following points :

1. Voltage.
2. Hoist capacity, hoisting speed (S or L).
3. Model number in name plate.
4. Correct part names and numbers.
5. Lineal length of push button cord, chain lift or power supply cable, when required.
